PROJECTS/HACKATHONS

Ezy.cv || Hacktrec @ abes college

October 2016

- Developed a Messenger-Bot which interacts with the user and responds with His event website deployed on heroku.
- Added capabilities to make resumes and give downloadable pdf links.
- Runner up and awarded best hack .
- Check this out at [messenger](#), [github](#) and [Youtube](#)

Smartelec || (GrassrootsHackathon 2017 @SNU)

January 2017

- Mobile Application
- Runner up .
- It is a demand size management solution for electricity surplus management in which according to the surplus energy produced at the grid the rate of electrical units changes dynamically and the person can schedule appliances to run when the rate is lowest for the day.
- Check the App [here](#), [github](#) and [Youtube](#).

DJ.ME || (Leisure project)

January 2017

- Mobile Application
- Developed the android app for dj.me which is an automatic Djing and Music mixing Platform. Used Wifi as a trigger beacon for hosting sessions and syncing playlists on a common server thus creating a common playlist for a community
- Check this out at [github](#) and [Youtube](#).

Finbot || (State Bank Of India-National Hackathon@SBI)

June 2017

- Mobile Application
- Built A Finbot,helps customers take wise financial decisions and aid them for other banking needs,will soon be deployed on their platform.
- Check this out at [github](#) and [Youtube](#).

Orient || (Leisure project)

January 2017

- Mobile Application
- An App used for converting any event into a smart event. This app works with bluetooth to know about fellow attendees, jury , guests etc. and to save their profile and look at their Linkedin profile.
- Check this out at [github](#).
- **Some basic home automation projects using raspberry pi and knowledge of python.**
